PROJECT EXPERIENCE

Event-Calendar

- The Event-Calendar will act as a personal assistant. It's a technologized "to-do" list and more. The base technology used will be the same that's used with Cheese-MVC-Persistent. https://github.com/JoeStroud/calendar

Cheese-MVC-Persistent

- A Web application development using Spring Boot, Spring Data, Java Persistent API, Gradle, Hibernate and Thymeleaf template engine to perform CRUD operations on data stored in a MySQL database. CSS3/HTML5 https://github.com/JoeStroud/cheese-mvc-persistent

Blogz

- A web app that runs multi-user blog site with personal blog pages and if offers the user the opportunity to choose between different views. Utilizing Python, Flask, SQLAlchemy, Jinja, Miniconda and CSS3/HTML5. https://github.com/JoeStroud/blogz
